

World Nuclear Association End Energy Users Panel Workshop

From Demand to Deployment: Shaping nuclear solutions for energy-intensive industries

8 June 2026, Istanbul, Türkiye

Sponsorship opportunities

**WORLD NUCLEAR
ASSOCIATION**

NIATR
NUCLEAR INDUSTRY ASSOCIATION OF TÜRKİYE

End Energy Users high-level event

This high-level event will bring together Industrial End Users exploring nuclear solutions from sectors such as petrochemicals, metallurgy, cement, desalination, and data centers with the global nuclear community, the financial and insurance sectors and anyone involved in nuclear projects to decarbonize and accelerate industrial development.

Opportunities

- Gain first-hand insights into various end energy users needs and explore opportunities where nuclear can meet industrial demand
- Connect and build partnerships between industrial energy users and the global nuclear community to accelerate clean energy solutions
- Identify challenges and shape practical solutions for nuclear to support industrial development

Why sponsor this event?

By supporting the End Energy Users Panel Workshop, your organization will be positioned at the heart of this critical dialogue. Sponsorship offers the chance to:

- Gain visibility with global decision-makers and leading industrial end users
- Show leadership in advancing collaboration between industry and energy users
- Forge lasting partnerships that accelerate nuclear deployment across diverse sectors.

Your support ensures this workshop is not only a meeting of ideas but a moment of action where the nuclear community and end users come together to define new opportunities and shape the future of energy.

The logo consists of a white diagonal line on a teal background, followed by the text "WORLD NUCLEAR ASSOCIATION" in white, uppercase, sans-serif font.

WORLD NUCLEAR ASSOCIATION

The World Nuclear Association's End Energy Users Panel serves as a collaborative platform between the nuclear industry and energy-intensive sectors. Its primary goal is to establish a constructive dialogue addressing the needs of energy-intensive industries and fostering confidence in the utilization of nuclear power for a sustainable and decarbonized energy future.

With this group, the World Nuclear Association aims to contribute to the effective and sustainable integration of nuclear energy across diverse industrial settings. The group welcomes a variety of stakeholders, withing WNA members and non-members.
